In other respects my examination included such review of the actuarial assumptions and actuarial methods and such tests of the actuarial calculations as I considered necessary."

or

"I have relied upon (name of accounting firm) for the substantial accuracy of the in-force records inventory and information concerning other liabilities, as certified in the attached statement. In other respects my examination included review of the actuarial assumptions and actuarial methods and tests of the actuarial calculations as I considered necessary."

Such a section must be accompanied by a statement by each person relied upon of the form prescribed by Rule Section 8(E).

6. The opinion paragraph should include the language recited in Rule Exhibit D attached.

C. Assumptions for New Issues

The adoption for new issues or new claims or other new liabilities of an actuarial assumption which differs from a corresponding assumption used for prior new issues or new claims or other new liabilities is not a change in actuarial assumptions within the meaning of this Rule Section 8.

D. Adverse Opinions

If the appointed actuary is unable to form an opinion, then he or she shall refuse to issue a statement of actuarial opinion. If the appointed actuary's opinion is adverse or qualified, then he or she shall issue an adverse or qualified actuarial opinion explicitly stating the reason(s) for such opinion.

This statement should follow the scope paragraph and precede the opinion paragraph.

E. Reliance on Data Furnished by Other Persons

If the appointed actuary does not express an opinion as to the accuracy and completeness of the listings and summaries of policies in force and/or asset oriented information, there shall be attached to the opinion the statement of a company officer or accounting firm who prepared such underlying data. The language should be similar to that recited in Rule Exhibit E attached.

SECTION 9. Description of Actuarial Memorandum Including an Asset Adequacy Analysis

A. General

1. In accordance with Section 3 of the NAIC Model Standard Valuation Law, Ark. Code Ann. §23-84-112, as amended by Act 621 of 1995, the appointed actuary shall prepare a memorandum to the company describing the analysis done in support of his or her opinion regarding the reserves under a Rule Section 8 opinion. The memorandum shall be made available for examination by the Commissioner upon his or her request but shall be returned to the company after such examination and shall not be considered a record of the Insurance Department or subject to automatic filing with the Commissioner.

2. In preparing the memorandum, the appointed actuary may rely on, and include as a part of his or her own memorandum, memoranda prepared and signed by other actuaries who are qualified within the meaning of Section 5(B) of this Regulation, with respect to the areas covered in such memoranda, and so state in their memoranda.

3. If the Commissioner requests a memorandum and no such memorandum exists or if the Commissioner finds that the analysis described in the memorandum fails to meet the standards of the Actuarial Standards Board or the standards and requirements of this Regulation, the Commissioner may designate a qualified actuary to review the opinion and prepare such supporting memorandum as is required for review. The reasonable and necessary expense of the independent review shall be paid by the company but shall be directed and controlled by the Commissioner.

4. The reviewing actuary shall have the same status as an examiner for purposes of obtaining data from the company and the work papers and documentation of the reviewing actuary shall be retained by the Commissioner; provided, however, that any information provided by the company to the reviewing actuary and included in the work papers shall be considered as material provided by the company to the Commissioner and shall be kept confidential to the same extent as is prescribed by law with assets may be aggregated by either of the following methods:

1. Aggregate the reserves and related actuarial items, and the supporting assets, for different products or lines of business, before analyzing the adequacy of the combined assets to mature the combined liabilities. The appointed actuary must be satisfied that the assets held in support of the reserves and related actuarial items so aggregated are managed in such a manner that the cash flows from the aggregated assets are available to help mature the liabilities from the blocks of business that have been aggregated.

2. Aggregate the results of asset adequacy analysis of one or more products or lines of business, the reserves for which prove through analysis to be redundant, with the results of one or more products or lines of business, the reserves for which prove through analysis to be deficient. The appointed actuary must be satisfied that the asset adequacy results for the various products or lines of business for which the results are so aggregated:

a. Are developed using consistent economic scenarios, or

b. Are subject to mutually independent risks, i.e., the likelihood of events

impacting the adequacy of the assets supporting the redundant reserves is completely unrelated to the likelihood of events impacting the adequacy of the assets supporting the deficient reserves.

In the event of any aggregation, the actuary must disclose in his or her opinion that such reserves were aggregated on the basis of method (1), (2)(a) or (2)(b) above, whichever is applicable, and describe the aggregation in the supporting memorandum.

B. Selection of Assets for Analysis

The appointed actuary shall analyze only those assets held in support of the reserves which are the subject for specific analysis, hereafter called "specified reserves." A particular asset or portion thereof supporting a group of specified reserves cannot support any other group of specified reserves. An asset may be allocated over several groups of specified reserves. The annual statement value of the assets held in

support of the reserves shall not exceed the annual statement value of the specified reserves, except as provided in Subsection (C) below. If the method of asset allocation is not consistent from year to year, the extent of its inconsistency should be described in the supporting memorandum.

C. Use of Assets Supporting the Interest Maintenance Reserve and the Asset Valuation Reserve

An appropriate allocation of assets in the amount of the Interest Maintenance Reserve ("IMR"), whether positive or negative, must be used in any asset adequacy analysis. Analysis of risks regarding asset default may include an appropriate allocation of assets supporting the Asset Valuation Reserve ("AVR"); these AVR assets may not be applied for any other risks with respect to reserve adequacy. Analysis of these and other risks may include assets supporting other mandatory or voluntary reserves available to the extent not used for risk analysis and reserve support.

The amount of the assets used for the AVR must be disclosed in the Table of Reserves and Liabilities of the opinion and in the memorandum. The method used for selecting particular assets or allocated portions of assets must be disclosed in the memorandum.

D. Required Interest Scenarios

For the purpose of performing the asset adequacy analysis required by this Regulation, the qualified actuary is expected to follow standards adopted by the Actuarial Standards Board; nevertheless, appointed actuary must consider in the analysis the effect of at least the following interest rate scenarios:

1. Level with no deviation;
2. Uniformly increasing over ten (10) years at a half percent per year and then level;
3. Uniformly increasing at one percent per year over five (5) years and then uniformly decreasing at one percent per year to the original level at the end of ten (10) years and then level;
4. An immediate increase of three percent (3%) and then level;
5. Uniformly decreasing over ten (10) years at a half percent per year and then level;
6. Uniformly decreasing at one percent per year over five (5) years and then uniformly increasing at one percent per year to the original level at the end of ten (10) years and then level; and
7. An immediate decrease of three percent (3%) and then level.

For these and other scenarios which may be used, projected interest rates for a five (5) year Treasury Note need not be reduced beyond the point where the five (5) year Treasury Note yield would be at fifty (50%) of its initial level.

The beginning interest rates may be based on interest rates for new investments as of the valuation date similar to recent investments allocated to support the product being tested or be based on an outside index, such as Treasury yields, of assets of the appropriate length on a date close to the valuation date. Whatever method is used to determine the beginning yield curve and associated interest rates should be specifically defined. The beginning yield curve and associated interest rates should be consistent for all interest rate scenarios.

E. Documentation

The appointed actuary shall retain on file, for at least seven (7) years, sufficient documentation so that it will be possible to determine the procedures followed, the analyses performed, the bases for assumptions and the results obtained.

SECTION 11. Disciplinary Actions

The Commissioner may impose sanctions on companies which have failed to comply with the provisions of this Rule in completing the annual statement with the appropriate actuarial certification and opinion, or in failing to file the statement of opinions when eligible for any exemptions under this Rule; and such

sanctions shall include but not be limited to those the Commissioner may impose on companies for failure to file, or failure to file a complete, annual statement under Ark. Code Ann. §23-63-216, including license suspension, revocation, and fines or monetary penalties.

Companies and actuaries filing false statements of financial conditions in connection with the actuarial opinions required by this Rule, or filing false or fraudulent actuarial opinions with the Commissioner, or knowingly making a false entry in these actuarial opinions in the reports or annual statements of the companies shall be deemed to have committed Trade Practices violations under Ark. Code Ann. §23-66-206 (4) and this Rule, in addition to other applicable provisions of Arkansas laws and rules; and shall be subject to administrative proceedings culminating in possible cease and desist orders, monetary -penalties, and/or license suspensions or revocations.

SECTION 12. Effective Date

The provisions of this Rule shall be effective on December 1, 1995. This Regulation shall take effect for annual statements for the year 1995, and filed with the Commissioner on or before March 1, 1996.

SECTION 13. Severability

Any section or provision of this Rule held by a court to be invalid or unconstitutional will not affect the validity of any other section or provision of this Rule.
